Artificial Intelligence:

A Convergence Point in Safety Development

As "yours truly" looks over this month's *Relay* for final publication, an Associated Press wire flashes across my screen on the subject of our newsletter this month, Artificial Intelligence. The headline? "Godfather of A.I. Geoffrey Hinton Leaves Google, Warns of Tech's Dangers". Though the headline is obviously designed to be provocative, this timely report warrants the focus of this edition. Our original article that examines Artificial Intelligence Machine Learning and its current and future impact on amateur radio, will be the focus of our June edition instead.

So why is news of Hinton changing his focus to **AI warning** "front page" worthy across the globe? Because Geoffrey Hinton is not just any tech guy. He's an expert researcher on cutting-edge artificial intelligence and its current and potential uses. Hinton is a pioneer developer of deep machine learning and neural networks. For 45 years, his work has built the instrumental foundation of today's AI technology.

Image Credit: LinkedIn.com

Born in London in 1947, he studied Psychology at Cambridge University in the late 1960's and earned a Bachelor's Degree in 1970. His interest in how Psychology could potentially impact Computer Science, and vice versa, led him on an interesting research journey and as a result, a PhD in Artificial Intelligence from Edinburgh in 1978.

Continued on Page 15

Geoffrey Hinton designed machine learning algorithms. His aim has been to discover a learning procedure that is efficient at finding complex structure in large, high-dimensional datasets and to show that this is how the human brain learns to see. He was one of the researchers who introduced the back-propagation algorithm and the first to use backpropagation for learning word embeddings. His other contributions to neural network research include Boltzmann machines, distributed representations, time-delay neural nets, mixtures of experts, variational learning, products of experts and deep belief nets. His research group in Toronto made major breakthroughs in deep learning that have revolutionized speech recognition and object classification. Mr. Hinton's contributions to the field of Artificial Intelligence research and development for 45 years earned him numerous awards, and the tech world's complimentary title, "The Godfather of AI".

ARAC Board Meeting - April 4, 2023

PRESIDENT

NØVRM
Gene Ellefsen

218-348-6649
aaøac@outlook.com

2ND YEAR BOARD

AAØAW
Doug Nelson

aaøaw@arrl.net

1ST YEAR BOARD

WØDIO
Denny Anderson

Present:

Board Members

Gene Ellefsen – NØVRM, Dave Pyrlík – KØDJP, Sam Frey – KCØYTM, Melinda Nelson – KFØGJW, Dave Davis – AAØAC, Doug Nelson - AAØAW

Meeting called to order by President Gene – NØVRM at 18:00 (6:00 pm)

Minutes:

Minutes were sent via email. Motion to approve Doug Nelson – AAØAW. Seconded by Dave Davis – AAØAC, motion passed.

Treasurer's Report:

Checking: \$1,779.53
Savings: \$1,775.68
Repeater: \$3,118.54
Subtotal Cash \$6,673.75

Winter CD: \$1,736.49
Summer CD: \$0.00
Subtotal CD: \$1,736.49

Assets Subtotal: \$8,410.24

Grand Total \$8,410.24

Motion to approve by Melinda Nelson – KFØGJW, seconded by Doug Nelson – AAØAW, motion passed.

Testing:

We are all set up for the HamFest testing session. The new General Testing Pool is out and will go into effect on July 1st. As always if you are looking to test or upgrade, or know of anyone that is interested in testing please contact Doug Nelson at AA0AW@arrl.net

Repeater:

Dave Pyrlík – KØDJP the new repeater is ordered and waiting to show up.

New Business:

Skywarn meeting next week. Meeting will start at 18:00 (6:00 pm)
HamFest – May 6th. \$10.00 entry fee. Looking for donations for drawings.

Grandma's Marathon – Make sure to sign up or let Doug know if you are not going to be at your spot this year.

Motion to adjourn by Melinda Nelson – KFØGJW, seconded by Sam Frey – KCØYTM, motion passed at 18:22 (6:22 pm)

ARAC Club Meeting Minutes

April 13, 2023

Present:

President: Gene Ellefsen – N0VRM
Treasurer/Membership: Sam Frey – KE0YTM
Secretary: Melinda Nelson – KF0GJW
First Year Board: Dennis Anderson – W0DIO
Second Year Board: Doug Nelson – AA0AW
Third Year Board: Dave Davis – AA0AC
Special Events: Open/Gene Ellefsen – N0VRM (acting)
Parliamentarian: Grant Forsyth – KC0WUP
Repeater: Dave Pyrlik – K0DJP
Testing: Doug Nelson – AA0AW
Repeater: Randy Wabik – KR0B
Property/Picnic: Scott Ahlgren – N0VYU
HamFest/Education: Bob Schulz – KC0NFB

Absent:

Vice President: Dave Pyrlik – K0DJP
Chaplin:
Web Site: Thomas Dorr – KE0RHA
Newsletter/Historian: Kim Waller – KE0NQS
Newsletter/Historian: Steve Waller – KE0NQT

Meeting called to order at 18:03 (6:03 PM) by President Gene Ellefsen – N0VRM. Forty-four (44) members in attendance.

Minutes:

Minutes are posted on the website and in the newsletter. Motion to approve by Grant Forsyth – KC0WUP, seconded by Bruce Carlson – KN0NUL. Motion Passed.

Treasurer's Report:

Checking: \$1,779.53
Savings: \$1,775.68
Repeater: \$3,118.54
Subtotal Cash \$6,673.75

Winter CD: \$1,736.49
Summer CD: \$0.00
Subtotal CD: \$1,736.49

Assets Subtotal: \$8,410.24

Grand Total \$8,410.24

Motion to accept as presented by Robin Davis, seconded by Jeff Nast – KC0MKS, motion passed.

Continued on Page 4

ARAC Club Meeting Minutes, continued

HamFest:

HamFest will be May 6, 2023. Entry Fee will be \$10.00. We are currently sitting at 25 tables. Looking for people to come and help set up. We are looking for Volunteers for the kitchen. Robin is resigning from making the pulled pork so we are looking for someone to take over making this. We are also looking for hourly drawing prizes.

Education:

Nothing scheduled at this time.

Testing:

Doug Nelson – AA0AW Next scheduled one will be May 6th at 10:00 AM during the HamFest. If anyone needs testing contact Doug Nelson at AA0AW@ARRL.net and they will test individually. **Do not forget to get your FRN number prior to testing.** You can go to FCC.gov/uls and register. You will also need an email address going forward.

Repeater:

Dave Pyrlík – K0DJP, waiting for the equipment to show up and weather to cooperate with getting out to Mahtowa and the 94-site.

New Business:

June Meeting will be about Grandma's Marathon.
Grandma's Marathon password this year is Ham23.

Silent Key: (Please keep their family in your thoughts)

Robert Peterson – W0PQX.

Door Prize was won by Mike Lovold – N0PDG.

Motion to adjourn by Jeffery Maker - AD0TH, seconded by Mike Lovold – N0PDG, motion passed at 18:17 (6:17 PM).

Prez Sez ...

Hi Everyone,

Spring is here (I think) and that means **ARAC Hamfest** time!

Saturday May 6 2023 9:00 am to 1:00 pm at the **Head of the Lakes Fairgrounds** on Tower Ave in Superior WI. We need setup help at 6:00 am to get the tables ready for the Vendors who start setting up at 7:00 am. Doors open to the Public at 9:00 am. We also need help at the end of the Hamfest to put away the tables and to clean up!! Hope to see many of you there. It is shaping up to be a good one!

With **Grandma's Marathon** coming up June 17th, now is a good time to start checking out your equipment to make sure everything is working properly and you have time get replacements if needed. If you would like to help out for the Marathon, let Doug Nelson or Scott Ahlgren know and they can set you up. All Volunteers need to register with Grandma's. Go to the **Grandma's Marathon Volunteer Registration** page at <https://grandmasmarathon.com/support-us/volunteer/> & use the password **HAM23**.

73,
Gene Ellefsen NØVRM

LOOKING for an **Amateur Radio License TESTING SESSION?**

*Schedule your own Testing Session **TODAY!***

Contact Doug Nelson-AA0AW at aa0aw@arrl.net or 218-391-5874

All Exam Candidates are **REQUIRED** to have an FCC Registration Number (FRN) before exam day, which will require your email address.

Not Currently Licensed? For New License Candidate FRN registration, go to: www.fcc.gov/new-users-guide-getting-started-universal-licensing-system-uls

Upgrading to General or Expert Class & not sure you have an FRN number?
go to

<https://wireless2.fcc.gov/UlsApp/UlsSearch/searchLicense.jsp>

UPGRADE CANDIDATES:

Please bring a copy of your current license to the exam session.

US Amateur Radio Bands

US AMATEUR POWER LIMITS

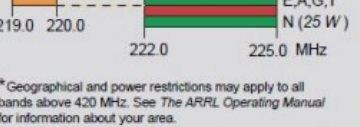

FCC 97.313 An amateur station must use the minimum transmitter power necessary to carry out the desired communications. (b) No station may transmit with a transmitter power exceeding 1.5 kW PEP.

Effective Date for
2,200 and 630 Meters
to be announced

ARRL THE NATIONAL ASSOCIATION FOR AMATEUR RADIO

On March 28, 2017, the Federal Communications Commission adopted rules that will allow Amateur Radio access to 472-479 kHz (630 meters) and to 135.7-137.8 kHz (2,200 meters). However, amateurs cannot use these frequencies until 30 days after the Report and Order is published in the Federal Register and the final procedures for registering stations with the Utilities Telecom Council (UTC) have been approved and announced. At the time this chart was created, the Report and Order had not been published and the UTC online registration site is not yet available. Follow ARRL news for further information. New charts will be published at www.arrl.org/graphical-frequency-allocations when the bands are fully available for use.

All licensees except Novices are authorized all modes on the following frequencies:

2300-2310 MHz	10.0-10.5 GHz ‡	122.25-123.0 GHz
2390-2450 MHz	24.0-24.25 GHz	134-141 GHz
3300-3500 MHz	47.0-47.2 GHz	241-250 GHz
5650-5925 MHz	76.0-81.0 GHz	All above 275 GHz

‡ No pulse emissions

KEY

Note:
CW operation is permitted throughout all amateur bands.
MCW is authorized above 50.1 MHz, except for 144.0-144.1 and 219-220 MHz.
Test transmissions are authorized above 51 MHz, except for 219-220 MHz

- = RTTY and data
- = phone and image
- = CW only
- = SSB phone
- = USB phone, CW, RTTY, and data
- = Fixed digital message forwarding systems only

E = Amateur Extra
A = Advanced
G = General
T = Technician
N = Novice

See ARRLWeb at www.arrl.org for detailed band plans.

Contest Calendar at www.contestcalendar.com

National Contest Journal at www.ncjweb.com

QSO Party Note: State/Province/National QSO Parties are abbreviated with the 2 or 3 letter abbreviation for the state/province/national designation followed by QP for QSO Party:

Examples: Minnesota QSO Party is MNQP
British Columbia QSO Party = BCQP

QRZ web site at www.qrz.com

VHF Propagation site at www.aprs.mountainlake.k12.mn.us

Reminder: The Contest Corral monthly listing of contests can be found in each issue of QST. ARRL sponsored contests can be found in Contest Corral, highlighted, or on the ARRL's web site at arrl.org.

ARRL Year-Long Operating Event Recognizing Volunteers

As announced in the January 2023 issue of *QST*, ARRL is celebrating a year-long operating event honoring all ARRL volunteers: **Volunteers On the Air**.

In similar fashion to the 2014 ARRL Centennial Celebration, and the 2018 International Grid Chase, this event will be exclusively driven only by QSOs uploaded to Logbook of The World (LoTW).

Highlights of the event include:

- ♦ **Earning Points for contacting W1AW Portable Stations:** There will be week-long activations of portable W1AW/# stations in all 50 states, and in several US Possessions/Territories, that will generate on-air activity to earn points. Each state will be activated twice. The schedule of when which states will be activated as posted in the ARRL dashboard at <https://vota.arrl.org/> and will be updated as changes/additions occur. See the POINTS TABLE for the full list of points.
- ♦ **Contacting ARRL Volunteers or Members on the air:** ARRL Officers, Directors, Section Managers (and their appointees), Staff, and even Members domestically (and DX) can be contacted for points. See the POINTS TABLE for the full list of points.
- ♦ **Using Logbook of the World (LoTW - see <http://www.arrl.org/logbook-of-the-world>)** as the QSOs data source, the 2023 Volunteers On The Air event features W1AW activations from all 50 states (twice) and several territories during 2023. Weeks will begin on a Wednesday and end on a Tuesday. Some weeks will be shown as off weeks to avoid other major operating events.
- ♦ **Participants will work W1AW portable stations** and ARRL volunteers to earn QSO points.
- ♦ **Participants do not need to upload to, or participate in LoTW.** Uploads to LoTW by W1AW portable stations and by the volunteers will feed the points scoring system.
- ♦ **A Leaderboard will be activated after the event ramps up**, and **Certificates** will be available during and after the event concludes. Once the year is completed, a final summary will be released.

ARRL Minnesota Section Manager Bill Mitchell AE0EE gives details on how to participate. He says:

Coming up May 10-16, W1AW/0 will be in Minnesota! Thanks to the hard work of MN Affiliated Club Coordinators Don Kelly, WA6ZMT, and Jim Froemke, K0MHC, and in partnership with Oklahoma section manager Mark Kleine, N5HZR, we are ready to announce the sign-up process.

Continued on Page 14

ARRL NEWS, continued from p.13

To sign up, you will need: the 6-character Maidenhead grid square where you intend to operate, and to figure out the UTC time when you would like to operate---all sign-up times listed are UTC.

* ON APRIL 1ST, ARRL Affiliated Clubs may begin signing up for time slots (here meaning a specific 2-hour time/band/mode slot). Each day on/after April 1st, clubs may sign up for up to two time slots. Clubs should use the /CLUB suffix on their callsign during sign-up.

* ON APRIL 15TH, ARRL Members may begin signing up for time slots. Each day on/after April 15th, clubs may sign up for one time slot.

ARES and public service clubs are particularly encouraged to consider signing up for voice slots on 2 m and/or 0.70 m (440 MHz) using FM, and to announce those times in advance so local hams know when they might hear W1AW/0. Although repeater contacts are not allowed as part of the event (though you can announce on a repeater that you are operating simplex; satellite is allowed), a W1AW/0 activation following a net could be a fun exercise.

Because accurate and complete logging is essential for the success of this event, all contacts should be logged electronically and ADIF files sent promptly to the coordinators. You will have further instructions on the upload process from them.

More details on the W1AW/0 MN event, the W1AW/P events in general, and the year-long Volunteers on the Air celebration can be found here:

<https://www.arrl.org/attachments/view/Group/109778>

Minnesota's sign-up page is here: <https://ok.arrl.org/w1awmn>

Further national information about the events can be found at: <https://arrl.org/vota>

Affiliated clubs should also check that their information is up to date in the club directory:

<https://arrl.org/clubs>

If you have questions, contact Don Kelly (arrl_mn_acc@donkelly.biz) and Jim Froemke (jim.k0mhc@gmail.com) for help.

On behalf of Don, Jim, and myself, thank you to all the ARRL members, clubs, and volunteers who do so much for the organization and our hobby. We look forward to hearing you on the air!

73,

Bill Mitchell AE0EE

Artificial Intelligence, *continued from page 1*

He then worked on a variety of computer science college research projects successively at Sussex University, University of CA San Diego, Carnegie-Mellon University, Canadian Institute for Advanced Research, University of Toronto and University College London. Hinton went on to split his time between Google's world headquarters in Mountain View, CA and the Google Canada HQ campus in Toronto. This brings us to present day, where upon we learn that Hinton has decided it's time to leave his Google team.

In a statement to *MIT Technology Review* he says he resigned from Google so that he could speak openly about the potential risks of artificial intelligence as someone who no longer works for a tech giant. "I want to talk about AI safety issues without having to worry about how it interacts with Google's business," he said. "As long as I'm paid by Google, I can't do that."

Hinton is known for his straightforward assessment of technology and is comfortable voicing his true, unvarnished view. He sees the next phase of his life as a crucial outgrowth of his life's work, that he, as a prevailing subject matter expert, has an important role in educating technology experts, and society as a whole, at this convergence point of artificial intelligence development.

He notes that this does not reflect any rift or concern with Google in particular, but rather, Google has "acted very responsibly" regarding AI and there are a lot of good things about Google that he would want to talk about as examples.

Tech billionaire Elon Musk has been voicing concerns about AI safety for the past 10 years. A basic internet search yields many statements and video interviews regarding various safety concerns he has for humans as artificial intelligence continues to get smarter and smarter. Though many people have viewed Musk as part of the problem in AI advancement, citing his research and development of self-driving cars and neural-network medical implants, Musk has made it clear that "the good guys" in research and development have to be ahead of any bad actors in the field of artificial intelligence.

Musk's critics also point to his involvement with OpenAI early on. He helped found the AI lab in 2015 as a nonprofit to ethically develop artificial intelligence that benefits humanity, but resigned its Board in 2018. He said he grew disillusioned with OpenAI because it no longer operates as a nonprofit as promised and is building technology that, in his view, takes sides in political and social debates. This creates a very subjective, manipulated and artificial view of the world that allows OpenAI's Chat GPT to make **value judgments of humans** based on their opinions, interests and worldviews. That results in Chat GPT categorizing, labeling and **sometimes negatively describing particular humans or groups of humans** as statements of fact, when actually the descriptions are based on what many would call "rogue" developers' subjective view of those individuals or groups. This is a problem, because artificial intelligence must view all humans neutrally, as simply part of the human race, and that the **human race itself is the utmost valued component of all things in existence**.

Artist's concept image, depicting modes of human interaction with Chat GPT, a Microsoft-funded artificial intelligence product created by OpenAI

Continued on Page 16

In fact, Musk has been on the forefront of research with the goal of understanding fully how AI can be applied to help humanity in pivotal breakthroughs in transportation safety technology and also medical technology for spinal cord and brain injuries. And he has “put his money where his mouth is”, with huge investments from his personal fortune. As a result of this research, it has become much clearer where potential weaknesses are in AI, and how and where to focus on building counter measures against “bad actors” trying to exploit technology to threaten the well-being of humans. This realization leads to research and development of AI “kill switch” coding and training models for various applications, as well as forming ethical standards of AI use and suggested federal regulations for artificial intelligence.

In April 2023 Elon Musk visited Washington, DC to meet with Congress Members to suggest federal regulation of artificial intelligence as a matter of public safety, just like a variety of other sectors. Well known for his opposition to government over-reach in the matters of U.S. citizens’ Constitutional rights, Musk’s earnest tone urging the awareness and creation of AI regulations for the sake of public safety is credible. He is certainly an AI expert who has spent a fortune on AI safety research and development.

With the release of the Microsoft-funded OpenAI chatbot called Chat GPT4 in March 2023, the general public was shocked at how advanced artificial intelligence as a technology currently is. A chatbot is a software application that aims to mimic human conversation through text or voice interactions, typically online. These chatbots are artificial intelligence systems that are capable of maintaining a conversation with a user in natural language and simulating the way a human would behave as a conversational partner. Such technologies often utilize aspects of deep machine learning (more about this next month) and natural language processing.

As everyday people and tech experts alike asked Chat GPT4 questions and gave it assignments, they were astounded and sometimes very unnerved at the replies. Shortly thereafter, more than 1,000 technology researchers, developers, and AI experts signed a letter calling for a six-month pause on AI development, expressing concern that safeguard coding and learning need to be priorities in AI to avoid potential future “profound risks to society and humanity.” Elon Musk was one of these signers. Did Geoffrey Hinton sign? Of that I am not sure, but based on his recent statements to the world, he concurs. “I have suddenly switched my views on whether these things are going to be more intelligent than us,” Hinton said in his recent interview with *MIT Technology Review*. “I think they’re very close to it now and they will be much more intelligent than us in the future... How do we survive that?”

Hinton’s choice to pose that chilling question to the world for maximum impact is brilliant. Arguably, there is no one else on Earth that the tech community would take more seriously on the topic, and they are indeed taking note for the sake of humanity. At this moment, AI R&D teams are beginning to connect to review each other’s work and have changed their focus to develop AI safeguards **together**. Hinton has already scheduled conferences and collaborative workshops to share his expertise to tech teams, answering their questions and posing important questions for them to apply to their work. This is a very encouraging “about face” in the history of technological development, and possibly one of the swiftest we’ve ever experienced.

Actually, humanity has been down this road before, in a sense. And as with any technological existential threat to humanity in the past, (chemical warfare, atomic bomb, nuclear warheads, bio-weapons, to name a few in past 100 years), we rise to the occasion by recognizing the threat and taking counter-measures.

The truth is AI is destined to have a huge impact on quality of life treatments for disease and injury, as well as greater safety for workers in many industries. It is likely that a whole new sector of lucrative technology entrepreneurship will consist of developing AI applications that detect and conduct threat assessment from AI in order prevent malevolent actors intending to harm infrastructure and humans. Much like IT as an industry created teams dedicated to virus/malware detection in the 1990’s to thwart “bad actors” that arose using the internet, the tech community will continue to develop, train and actively oversee artificial intelligence activity to safeguard the private and public interests in our world. And just like we’re all aware of best practices to avoid malware and what to do if detected, we the Public, will learn to understand and be aware of AI and its proper functions in our world. So we will continue, as the human race, to live our lives to the fullest, with awareness—but not fear—of AI. ★

The ARAC RELAY

Published monthly and distributed free to members, "The RELAY" is the official publication of the Arrowhead Radio Amateur Club, Inc. Members are encouraged to submit articles, opinions, and classifieds. Your submission will be placed as soon as possible providing it does not conflict with the bylaws of the Arrowhead Radio Amateur Club, Inc. The editors reserve the right to omit any submission that is not a required item. If a submission is questionable, it will be presented to the Board of Directors at the next scheduled board meeting for authorization.
